-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 2 recites the limitation "said out" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-46 are rejected under 35 U.S.C. 103(a) as being unpatentable over Panescu et al. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Panescu et al. (US 6056745). Panescu et al. disclose an electrosurgical device having a proximal end and a distal end, the device comprising: a handle; a shaft extending from the handle, the shaft having a distal end; a fluid passage being connectable to a fluid source; an electrode tip having an electrode surface, at least a

Art Unit: 3739

portion of the electrode tip extending distally beyond the distal end of the shaft; and at least one fluid outlet opening in fluid communication with the fluid passage and the at least one fluid outlet opening is arranged to provide a fluid from the fluid source to the electrode tip.

Panescu et al. teach all of the limitations of the claims except the portion of the electrode tip extending distally beyond the distal end of the shaft comprising a cone shaped portion and at least a portion of the electrode surface has a contact angle with a fluid from the fluid source of less than 90 degrees. To have provided a cone shaped electrode would have been an obvious modification to one of ordinary skill in the art at the time the invention was made, since it has been held to be within the general skill of a worker in the art to select a shape on the basis of its suitability for the intended use as a matter of obvious design choice.
